

Junaid Abbas

Backend Developer | React.js | Node.js | Express.js | TypeScript | MongoDB | REST APIs

Lahore, Pakistan | 0312-4788977 | github.com/jjbhatti07 | linkedin.com/in/junaidabbas0

SUMMARY

Results-driven Backend Developer with proven experience building and shipping REST APIs, authentication systems, and full-stack web applications using Node.js, Express.js, React.js, TypeScript, MongoDB, and Python. Experienced with JWT authentication, bcrypt, CRUD APIs, input validation, third-party API integration, Git, CI/CD fundamentals, and Docker. Working knowledge of Anthropic Claude API and other LLM/AI APIs, supported by IBM and Google AI certifications. Delivers clean, production-ready code quickly and adapts to new technologies under deadline.

TECHNICAL SKILLS

- Backend: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt
- Frontend: React.js, Tailwind CSS, Firebase Authentication
- Languages: TypeScript, JavaScript, Python
- Databases: MongoDB Atlas, SQLite
- AI/LLM: Anthropic Claude API, LLM API Integration, Prompt Engineering
- DevOps & Tools: Git, GitHub, CI/CD Fundamentals, Docker, VS Code, Vercel, Railway
- Collaboration: Cross-functional UI/UX collaboration with frontend and design teams

PROFESSIONAL EXPERIENCE

Backend Development Intern - *DevelopersHub Corporation* Jun 2026 - Jul 2026

- Built a full-stack eCommerce application using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB Atlas with JWT authentication, bcrypt password hashing, admin-protected routes, search, and pagination
- Developed a standalone Bookstore REST API with full CRUD operations, express-validator input validation, duplicate ISBN checking, and wishlist functionality
- Deployed applications using Vercel for frontend and Railway for backend

Backend Development Intern - *DecodeLabs* May 2026 - Jun 2026

- Completed four sequential backend projects: a REST API with in-memory storage, a full CRUD database API using SQLite, a JWT/bcrypt authentication system, and a third-party OpenWeatherMap API integration using Axios
- Resolved environment and dependency issues across projects including Prisma configuration changes and Git history cleanup

PROJECTS

TryONa - AI-Powered Virtual Fitting Room - *Final Year Project (FYP)* 2026

- Built an AI-powered virtual fitting room and fashion assistant using React.js, Context API, Firebase Authentication, and MongoDB Atlas
- Designed and implemented full application architecture including routing, state management, and REST API/data flow

HealthAI - AI-Powered Health Assistant - *Personal Project* | github.com/jjbhatti700-jpg/healthai

- Built a full-stack health assistant with symptom analysis, personalized recommendations, and health history using React.js, Node.js, Express.js, MongoDB Atlas, and AI/ML API integration
- Implemented secure user authentication and personalized health data management

Expense Tracker - Personal Finance App - *Personal Project* | github.com/jjbhatti700-jpg/expense-tracker

- Developed a full-stack finance application for tracking income and expenses with analytics, reports, and budget goals using React.js, Node.js, Express.js, and MongoDB Atlas

TaskFlow - Task Management App - *Personal Project* | github.com/jjbhatti700-jpg/taskflow

- Built a task management application for creating, organizing, prioritizing, and tracking tasks using Next.js, React.js, and Tailwind CSS

EDUCATION

BS Computer Science - *University of Central Punjab (UCP)*

2026
